

Felipe A. Medeiros, M.D., Ph.D. is an Associate Professor of Ophthalmology and Medical Director of the Hamilton Glaucoma Center, University of California San Diego.

Dr. Medeiros' research interests encompass many different areas in glaucoma, including identification of risk factors for development and progression of disease and methods and strategies for diagnosis, follow-up and management of glaucoma. He has published over 110 peer-reviewed publications in major Ophthalmology journals and 3 books on the evaluation of the optic nerve, visual field and intraocular pressure in glaucoma. Dr. Medeiros developed the first validated risk calculator for prediction of glaucoma in patients with ocular hypertension and has also published numerous research articles on new imaging technologies for glaucoma evaluation.

Dr. Medeiros is the recipient of numerous awards in Ophthalmology, including the American Glaucoma Society Clinician Scientist Award and American Academy of Ophthalmology Special Recognition Award. He serves as a member of the Research Committee of the American Glaucoma Society and the Associate Advisory Board of the World Glaucoma Association. He is also member of the Editorial Board of the Journal of Glaucoma and International Glaucoma Review and serves as a reviewer for several other major ophthalmology journals, including Ophthalmology, Archives of Ophthalmology, American Journal of Ophthalmology, and Investigative Ophthalmology and Visual Sciences.

Dr. Medeiros has oriented several postdoctoral fellows from different parts of the world. He is Professor of the Post-Graduation Services at the Federal University of Sao Paulo and University of Sao Paulo, the two premiere medical institutions in Latin America. He has delivered several keynote lectures throughout the world in major Ophthalmological meetings, including the Russian Congress of Ophthalmology (2005), Nordic Congress of Ophthalmology (2006), International Glaucoma Symposium Madrid (2006), Jules Gonin Switzerland (2006), Portuguese Glaucoma Symposium (2008) and Brazilian Glaucoma Society (2008 and 2009), among others.
